

Batman :  
The Black Mask  
Villian Lookbook

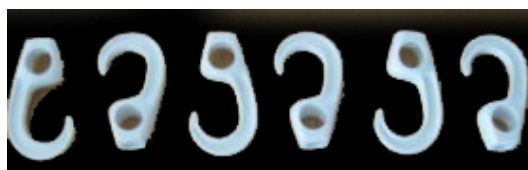

# The Mask

The Black Skull mask is broken up into three pieces. The front piece is the essential part of the mask and will have the most detail.

The second piece is the back of the head which will be a very sturdy material - it will be a shiny black whereas the front will be flat. The jaw will match the front with a flat finish.

The mask will be held together with a shock cord and stylized sharpened versions of the hooks below. The mask will be pulled tight by the cord and this will allow the jaw movement while forcing it back in place when not in use.

# The Suit

## (Upper)

The suit will be a combination of an old 50 styled suit with a more modern undershirt with a large collar.

This will hide the transition between the mask and human flesh and will give The Black Mask more body definition under his stylish suit.

\$1,200

# The Suit

## (Lower)

The lower half of the suit will be simple black pants, slightly baggy and bigger than normal dress clothes would be to allow for range of motion.

Also rather than the typical dress shoes The Black Mask will wear near-combat type boots.

# Accessories

The Black Mask has a few accessories that accent his look.

The first are the penny cufflinks. The Black Mask 's backstory involves parents who cared more about money than him so I find these cufflinks would be very appropriate.

The next is the white gloves to help further cover up any of his human features.

The third is the neck tie with the unusual flat end. This is just something to give him a more unique look.

The final piece is a worn leather belt from the uniform of a WWII soldier.

# Weapons

The Black Mask uses fear and intimidation as his primary weapon, but otherwise a pistol is his weapon of choice. He usually keeps two on him at any given time, along with a knife for backup.
